

Automatic RX (chlorine) and pH control system

Περιγραφή

Automatic control and correction of chlorine and pH, indirectly through Redox.

Includes:

- 2 central electronic controllers Cl - pH with 220V on / off outputs on single gearbox
- 1 continuous flow sampler for electrode adjustment
- 1 Redox electrode (chlorine)
- 1 pH electrode
- 2 chlorine solution dispensers and pH adjuster (code P50162-170)
- Flexible transparent conductors Ø10 length 10m with flow control valves, for power supply to the sampler
- Flexible transparent conductors Ø6 for supply of chemicals, 20m
