

Automatic RX-pH control system with tablet chlorine

Περιγραφή

Automatic control and correction of chlorine and pH, indirectly through Redox.

Automatic ON-OFF chlorination can also be done with a chlorine tablet, after replacing one dispenser with a tablet container (code P50180, P50182)

In this case the system includes:

- 2 central electronic command processors Cl - pH with on / off outputs 220V on a single box)
- 1 continuous flow sampler for electrode adjustment
- 1 Redox electrode (chlorine)
- 1 pH electrode
- 1 chlorine solution dispenser and pH adjuster
- 1 solenoid valve (code P50232)
- Flexible transparent conductors Ø10 length 10m with flow control valves, for power supply to the sampler
- Flexible transparent conductors Ø6 for supply of chemicals, 20m
