

BIG BLUE 2-STAGE FILTRATION SYSTEM, 10"

Περιγραφή

Aquafilter offers HHBB10A 2-Stage Whole House Big Blue® filtration System suitable for POE (Point of use) installations. HHBB10A housings are compatible with a broad range of cartridge types available on the market. Additionally, pressure drop can be monitored through the two pressure gauges located in the inlet and outlet positions of the system besides the microbial protection conferred by blue colored-housings in sunny locations. Equipped with pressure relief valves and a rounded bottom which increases stress resistance, HHBB10A ensures a continuous supply of fresh and clean drinking water.

SYSTEM CONTENT & SPECIFICATIONS
