

Rectangles of different depth

Περιγραφή

The fastest pool construction achieved by a set of galvanized steel wall panels in the required quantity along with their supports and their connecting fittings.

Each prefabricated pool kit includes:

- a. The galvanized steel body of the walls with all its supports
- b. The reinforced polyester (FRP) engine room of the pool and
- c. The required E / M equipment for each size of pool

The internal coating-insulation of the pool is made with heat-sealed on-site plastic colored sheet (LINER) of 1.5mm thick PVC, with internal reinforcement of polyester fibers (not included in the price of the pool).
